Message from CPM

Dear Readers,

For any education system to be successful, the decision makers have to heavily rely upon the data and statistics available. It gives me immense pleasure and sense of achievement to present the Sindh Education Profile which is significantly instrumental for education sector planning. The Education Profile in hand is based on Annual School Census 2013-14 and facilitates the educational managers to understand the education sector in Sindh.

At present the Sindh Education Management Information System (SEMIS) has taken up the lead in expanding its scope from data collection to dissemination and publication. Thus making it user friendly and a prime document for policy making and planning.

This Sindh Education Profile presents a detailed prospect of the status of public institutions in view of its enrolments, availability of teachers in public school system, the infrastructure and facilities etc. SEMIS data displays a significant insight in order to plan and deploy the resources appropriate to the contextual needs of each school in the province.

I would like to urge that this exercise should continue as the Sindh Education Sector has certainly yielded through this information system. At the same time I understand the uphill struggle required in the compilation and the production of excessive supportive document. For this I would like to congratulate Sr.Program Manager, Program Manager, Program officer, MIS Consultant, and SEMIS team who has made us realize the essence of such a vital Statistical report.

I hope that this report will enable all the policy makers and decision makers to realize the issues and challenges of education sector in Sindh.

Saba Mahmood Chief Programme Manager, Reform Support Unit, Education & Literacy Department, Government of Sindh.

Message from SPM

Dear Readers,

Sindh Education Management Information System (SEMIS) team is pleased to publish the Sindh Education Profile based on Annual School Census 2013-14. The Annual School Census (ASC) has become a regular feature since 1991and this year the team has successfully completed 23rd cycle of ASC exercise.

The Annual School Census is based on statistical data and captures the overall information of students, teachers and infrastructure as well as the school facilities ranging from school enrollment, gender index, and district wise participation rates and dropouts, hence compiles it in a single document and formulates a complete Education Profile of the province.

The purpose of the Sindh Education profile is to update the stakeholders on the status of education in the province and to help them translate data into programs. Moreover this turns out to be the under pinning document for the policy makers, managers and implementers to plan the key interventions in order to get education sector better.

The extensive scope of Sindh Education Profile acts as a guiding principle for the policy makers and leaders to develop the educational course of action in the province as per the need of the locale. In order to facilitate the decision making process of the planners, the SEMIS team ensures the reliability and accuracy of data to its utmost level.

The ASC exercise is a gradual process and involves steps like distribution of ASC questionnaire, data collection, cleaning of data, compilation and finally the dissemination of the status of education sector. It is noteworthy to recognize the increasing demand of the ASC statistics by all the stakeholders, as most of the reform initiatives in Sindh are now designed and delivered on the basis of SEMIS data.

It would be unmerited if the efforts of SEMIS team are not acknowledged. I share the credit of this accomplishment with the SEMIS team which has been striving hard to improve the ASC exercise by being innovative, making novel use of technology and reliable means to improve the quality of data.

This year SEMIS team has initiated two major reforms in data collection. To improve the value of data, this year along with the team the data has also been collected through an independent firm in three districts of Sindh Badin, S. Benazirabad and Karachi. The other reform is to collect data online. This year the team has also collected online data of more than 700 High and Higher Secondary Schools.

This high level attainment would have not been possible without the collective efforts of the team. Here I like to appreciate the great contributions of SEMIS team in earning this valuable recognition while making this achievement possible.

I hope this Statistical report will serve the purpose of making education interventions in the appropriate direction. I look forward to issue a Silver Jubilee edition next year with further innovations to add value to the existing Education profile.

Ghulam Nabi Laghari Senior Program Manager (I & I) Reform Support Unit Education & Literacy Department Government of Sindh.

About Sindh Education Management Information System (SEMIS)

1. Introduction

The Reform Support Unit (RSU) was established within the Department of Education (DoE) to execute the Sindh Education Reform Program (SERP). The Organizational Structure of RSU comprises of three wings; 1-Policy wing; 2-Monitoring and Evaluation wing; and 3- Sindh Education Management Information System (SEMIS) wing. Under this organogram, the RSU functions by developing subprograms i.e. the School Rehabilitation Program, School Management Committees, SEMIS (Annual School Census), School Consolidation, School specific budgets, Teacher Recruitment and Training and Student Achievement Test etc.

2. Background History of SEMIS or Sindh-EMIS cell

Annual School Census (ASC) exercise was initiated in 1991 with a purpose to collect data and develop information bank for Educational Planners, Managers and policy/decision makers for effective and goal-oriented policy-making in Education Sector. The purpose of Sindh EMIS cell is to prepare timely and accurate data of students, teachers, schools and other facilities.

In the Year 2006, the SEMIS Directorate was merged with the Reform Support Unit (RSU) specially to develop a framework for the reform assistance across the Sindh Province. With this development, the roles and responsibilities of District Officer (DO) SEMIS with many other stakeholders increased manifold. The emerging role of DO SEMIS required to supervise and coordinate the activities of additional offshoots of RSU like Girls Stipend Program, Distribution of Textbooks, School Rehabilitation Program and others apart from regular SEMIS initiated traditional Annual School Census (ASC) exercise. DO SEMIS virtually acts as a "focal person" and a right arm of RSU and had come to play the role of a bridge between District and Province.

3. Objective of Sindh Education Management Information System (SEMIS):

The Sindh-EMIS is a structured, scheduled and managed system for collecting, processing and retrieving information about the three main components: School profile, Student Enrollment and Staff information. It also generates all the statistical data, reports and queries.

The core objectives of SEMIS are:

- 1. To conduct Annual Institutional Census and producing Educational Statistics of Sindh Province.
- To provide reliable & timely Information to Educational Researchers, Planners, Administrators & Donor agencies by generating readymade data for effective Educational Planning and Management.
- 3. To develop coordination with donors & other organizations working in Education Sector for reform purpose.

4. Data collection of schools

ASC exercise comprised of four phases mentioned below.

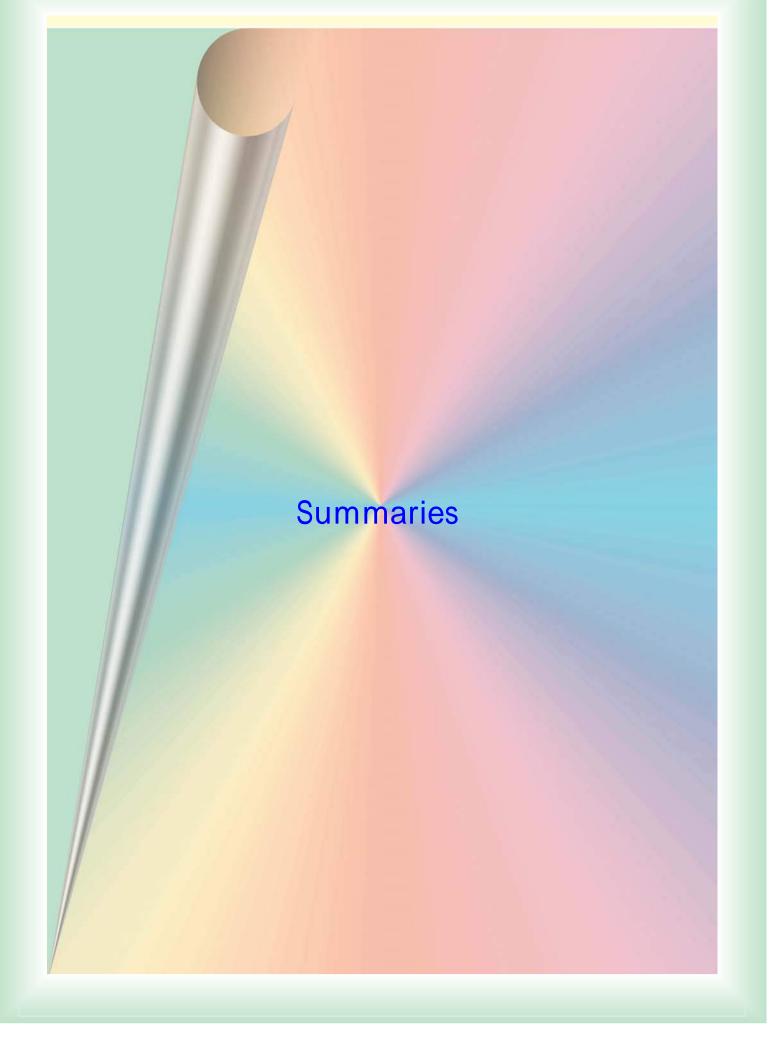

- 1. Preparation
- 2. Execution / Data collection
- 3. Production
- 4. Dissemination

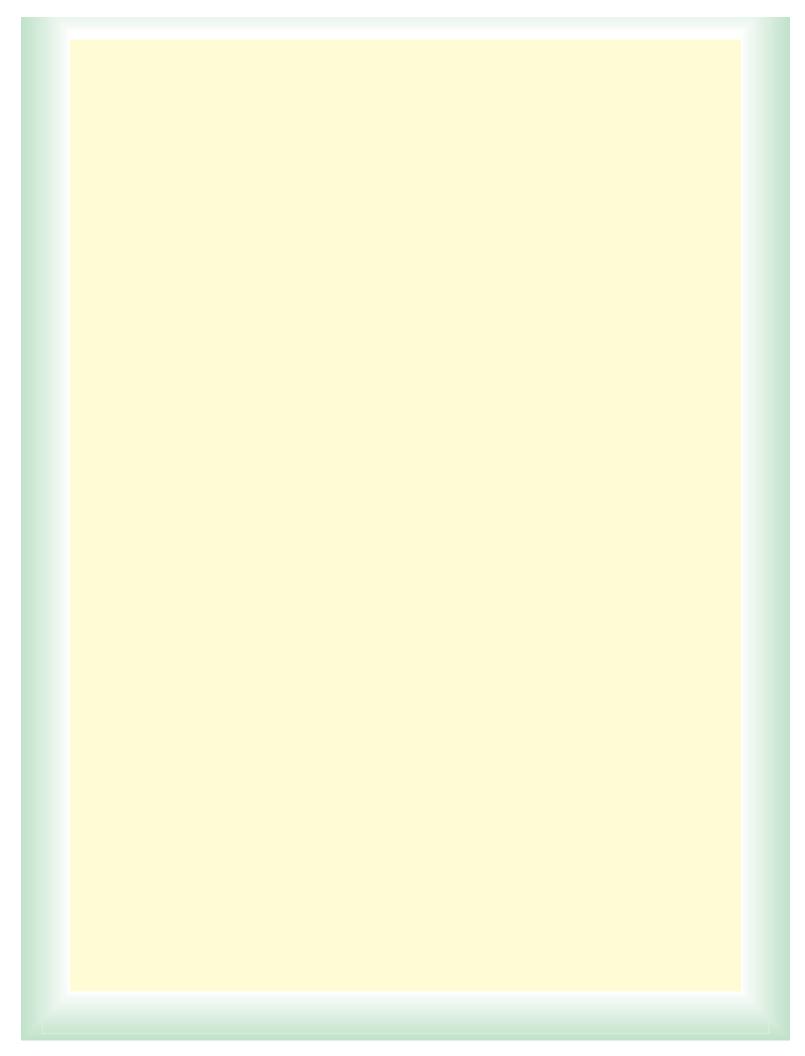

In the current year, Annual School Census 2013-14 data for Primary, Middle and Elementary Schools was collected through selected Supervisors for Primary Education (SPEs) in 20 districts. In addition, an independent firm was hired to collect data in three districts i.e Badin, S. Benazirabad and Karachi. SPEs and the independent data collectors filled the given proforma as per reference date October 31, 2013 by visiting every school (*list of all schools along with the SEMIS code embossed Proformas provided by RSU SEMIS wing*) as per given list. After completing the data collection survey SPE /data collectors filled the checklist (*summary sheet included four core indicators, 1-School Status, 2-School enrollment, 3-Working Teachers and 4-Classromms*) and handed over a complete bunch along with the summary sheet to Assistant District Officer Male/Female (ADO M/F). The ADO (M/F) submitted all Taluka forms to the DO SEMIS & Planning through ADO Elementary.

For Secondary & Higher Secondary Schools, all Headmasters filled the proforma as per reference date October 31, 2013 and submitted to District Officer Secondary& Higher Secondary (DO Sec & H. Sec). The DO Secondary & H. Secondary filled the checklist (summary sheet included four core indicators, 1-School Status, 2-School enrollment, 3-Working Teachers and 4-Classromms) and handed over the forms to the DO SEMIS & Planning.

In case any school was found without SEMIS Code, the blank form was filled for that school.

DO SEMIS & Planning filled the district level Checklist (summary sheet included information about photocopy of three evidence attached 1-CNIC for each teacher, Students Attendance Register and Teachers Attendance Register and also four core indicators, 1-School Status, 2-School enrollment, 3-Working Teachers and 4-Classromms) and handed over all proformas along with district level checklists to the Senior Program Manager SEMIS (SPM SEMIS) at RSU Karachi Office.
